### MULTIPLICATION

#### Repeated addition (multiplication)

Here are 4 cars in a car race. Each car has 2 men. How many men are there in all?

We can solve this question by using a long form:

$$2 + 2 + 2 + 2 = 8$$

Short form of writing this question is:

$$4 \times 2 = 8$$

Four times two is eight

This is a multiplication question. 'x' is the multiplication sign.

Now solve these questions.

Here are 3 children. Each child has 5 balloons. How many balloons are there in all? Write down.

$$5 + 5 + 5 = 15$$

$$3 \times 5 = 15$$

$$3 \text{ times } 5 \text{ is } 15$$

Here are 2 mice. Each mouse has 6 whiskers. How many whiskers are there in all? Write.

$$6 + 6 = 12$$

$$2 \times 6 = 12$$

$$2 \text{ times } 6 \text{ is } 12$$

Here are 4 elephants. Each elephant has 4 legs. How many legs are there in all? Write.

$$4 + 4 + 4 + 4 = 16$$

$$4 \times 4 = 16$$

$$4 \text{ times } 4 \text{ is } 16$$

Write the repeated addition in the form of multiplication question.

$$3 \times 2 = 6$$

$$\underline{\quad} = 16$$

$$\underline{\quad} = 9$$

$$\underline{\quad} = 25$$

$$\underline{\quad} = 12$$

$$\underline{\quad} = 6$$
